

Oliver Kersey

Front-End Web Developer

Hello! My name is Oliver and I'm a web developer and a graduate of Juno College in Toronto. I've had a passion for web development language and coding almost my entire life, and am now changing careers to pursue this dream professionally. I've undertaken Juno College's 9-week web development intensive boot camp, and I am excited to expand my skill-set and seek constant challenges to build and learn!

SKILLS

HTML/CSS

React

Javascript

JQuery

Responsive Web Design

SASS

APIs

Paired & Mob Programming

Firebase

Web Accessibility

Version Control using Git and GitHub

Best Practices for Modern Text Editors

PERSONAL PROJECTS

Penfield Mood Organ — JQuery/API Project (06/2020 - 07/2020) [↗](#)

- Inspired by Blade Runner, this project showcases the Giphy.com API. AJAX calls are employed based on checkbox selections of moods, returning gifs based on selected search values and accompanied by mood-relevant synth sound FX.

Whale Map Resource - React Project (09/2020 - 10/2020) [↗](#)

- A React project incorporating three APIs: the HERE Maps API, the React-Leaflet API and the Whale Museum Hotline API. A selection of marine species are represented with buttons that, on click, generate Axios calls cross-referencing the most recent sightings with the HERE Maps API through the React-Leaflet API, showing the location on a map and rendering additional descriptive information.
